

SCIENCE VILLAGE HALL

The Event Hall in The Loop

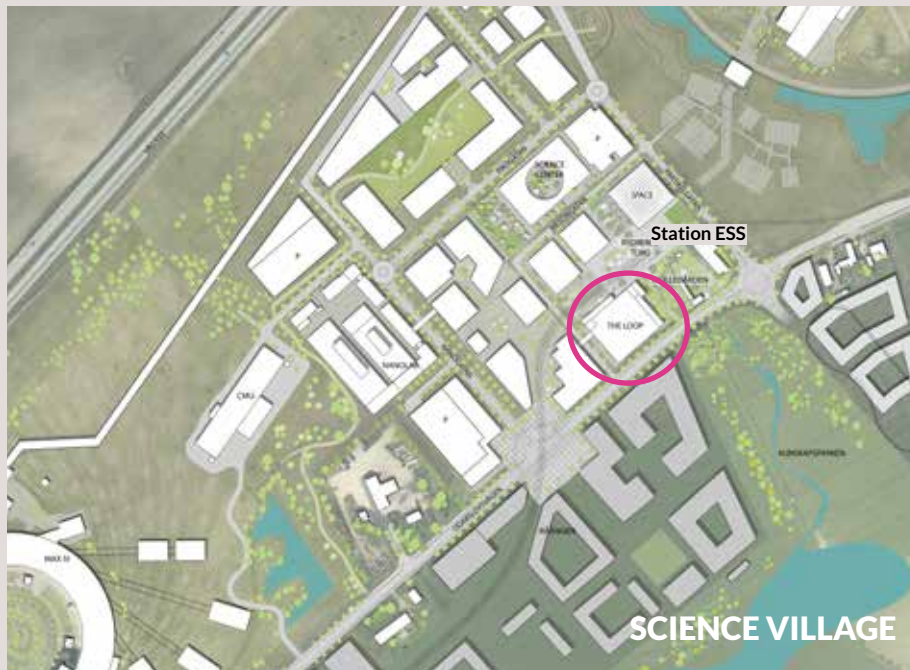

THE LOOP IN SCIENCE VILLAGE

SCIENCE VILLAGE – BRIGHT IDEAS MATTER

Science Village is a new city district located in the close vicinity of the world-leading research facilities ESS and MAX IV. In Science Village people (scientists and engineers) from all over the world will work, meet, and develop new ideas and innovations.

In Science Village there are plans for a significant expansion of the well renowned University of Lund. A new college campus will be developed, a Science Center will be built offering possibilities for everyone to discover the beauty of science, and there will be thousands of jobs within research and commerce. In the heart of Science Village, at Rydberg's Square, several restaurants, outdoor cafés, and outdoor workplaces are planned.

Throughout Science Village, green recreation areas provide a variety of connected parks and green pockets in the urban environment, starting at the hills of MAX IV. The southernmost greenery, just outside the Loop, offers a picturesque environment with its vicinity to the mill and the refurbished miller's house, before connecting to Kungskaps-parken, the second largest recreational park of Lund.

THE LOOP – MEET, MERGE, EVOLVE

Located at Rydberg's Square, the Loop is one of the first buildings to be completed (springtime 2024) in Science Village.

The building is designed to facilitate and support meetings and collaboration between Science, business and art and music.

The Loop contains several public environments such as a restaurant, offices, labs, co-working spaces, meeting rooms for 250 people, a collaboration arena, and a flexible event hall designed for 1000 people– **the Science Village Hall**.

This is the perfect place to meet and exchange experiences, generate innovative ideas, gather energy and knowledge while at the same time socializing, having fun, and making new contacts.

From Lund Central, the tram to Rydberg's Square, takes only 14 minutes.

SCIENCE VILLAGE HALL IN THE LOOP

The grand opening of Science Village Hall is slated for the autumn of 2024. This unique multi-purpose Event Hall, holding 1000 seated people, will be the obvious place for companies, researchers, academics, the public and visitors.

Let yourself be inspired by the cutting-edge science research by day or enjoy the evening when the building is filled with culture and entertainment with song, tempo, beats and laughter.

The Event Hall is perfect for conferences, lectures, but also concerts, stand-up, musicals, and theater. The Event Hall is ideal for corporate events such as kickoffs, Christmas parties, general meetings, and user meetings. Thanks to the Event Hall's fabulous flexibility, it can quickly and easily change function from conference seating to house banquettes and exhibitions.

In the spacious foyer there will be a large restaurant, wardrobe, and toilet facilities. The foyer is a perfect area for mingling and can be used as an exhibition and display area.

Second floor, "**Level Two**", is operated by Altitude Meetings. They have many years' experience in event management, conferences, and workshops and will be offering their services on request.

Level Two has six meeting rooms ranging from 15 to 100 people, co-working spaces, a specially designed collaboration arena, and a lovely lounge. Even larger events and conferences can be arranged when the Event Hall and Level Two are used in conjunction.

SPACE

- 720 sqm
- Capacity of 1.000 people and seating for 950
- Three floors: parquet seating, first & second balcony
- Ceiling height: 16m
- Stage area: 80cm high, 18m wide, and 7m deep (fixed)

FUNCTIONS

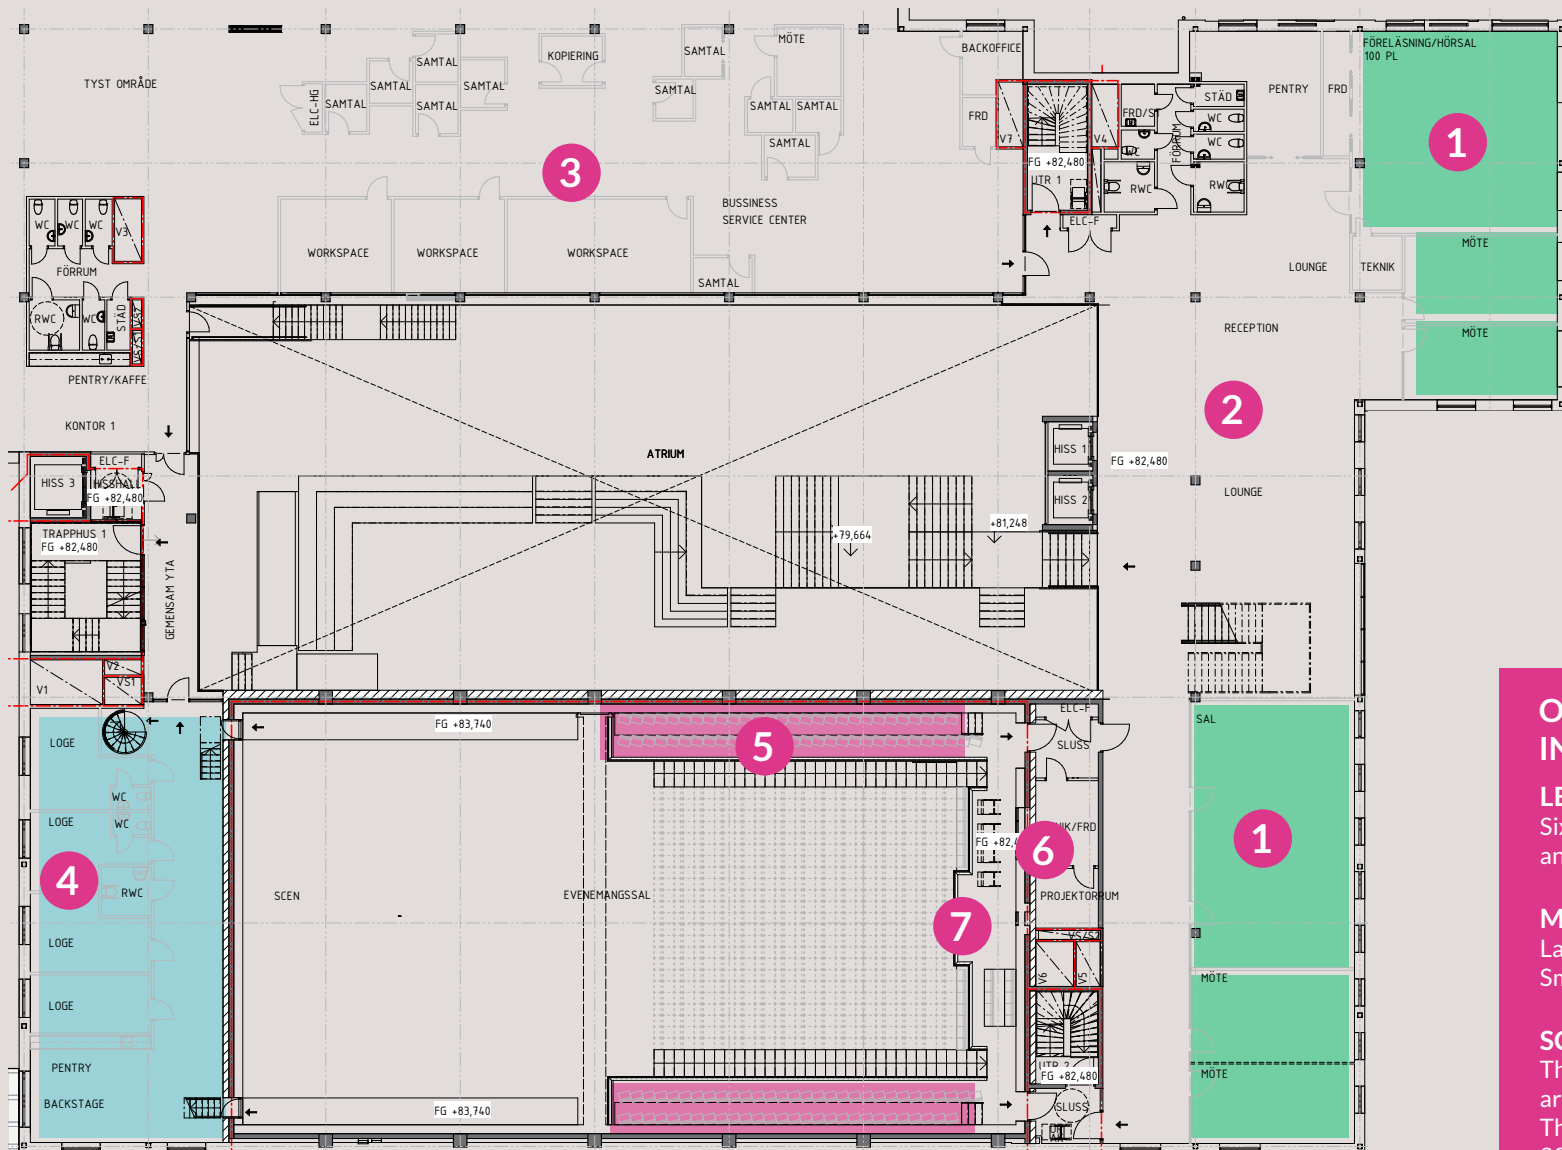

- The event hall is equipped with telescopic seating (flexible seating system) that can be pushed in and out rapidly from the wall enabling a variety of different activities
- A built-in acoustic curtain wall can divide the Event Hall into two parts
- 3m wide mountable podiums that can extend the stage to 10m depth
- Spacious backstage area with loading area on two levels with dressing rooms, kitchenette, and WC/showers

TECHNICAL EQUIPMENT

The Science Village Hall is equipped with modern technology suitable for all types of events.

- Mixing area for audio, lighting and pictures, data/video projection.
- Projector with screen
- Microphones (wireless)
- Artificial Reverberation systems simulate a reverberation that allows classical and acoustic music to perform with the best acoustics

SECOND FLOOR

1. MEETING ROOMS (For 250 people)
2. LOUNGE
3. CO-WORKING & COLLABORATION AREA
4. DRESSING ROOM
5. SIDE BALCONY (96 people)
6. TECHNICAL/PROJECTOR ROOM

OTHER CONFERENCE FACILITIES IN SCIENCE VILLAGE

LEVEL TWO I THE LOOP

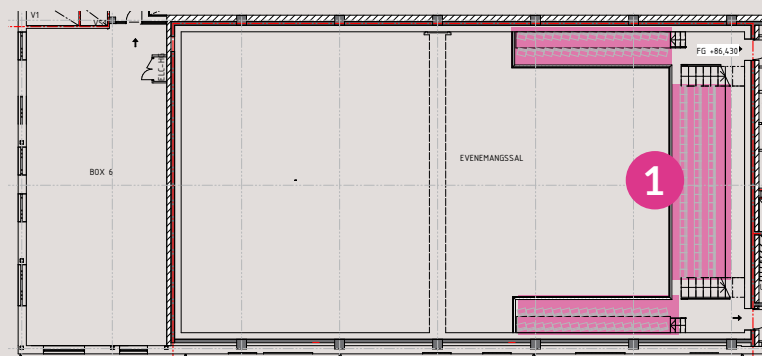

Six meeting rooms for 250 people (from 15 to 100 people) and three rooms in the collaboration arena (45 people).

MÖLLEGÅRDEN

Large conference room accommodating 30 people
Smaller conference room accommodating 10 people

SCIENCE CENTER (2025-2026)

The XS Hall is designed to host exhibitions and display areas (approx. 470 sqm).
The Auditorium (approx. 220 sqm) accommodates 200 people.

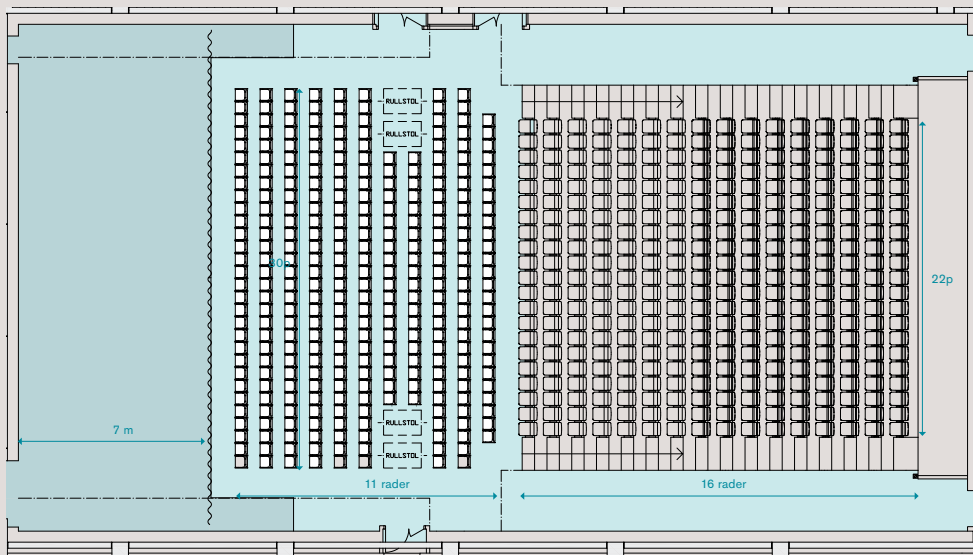

THIRD FLOOR

1. UPPER BALCONY (142 people)

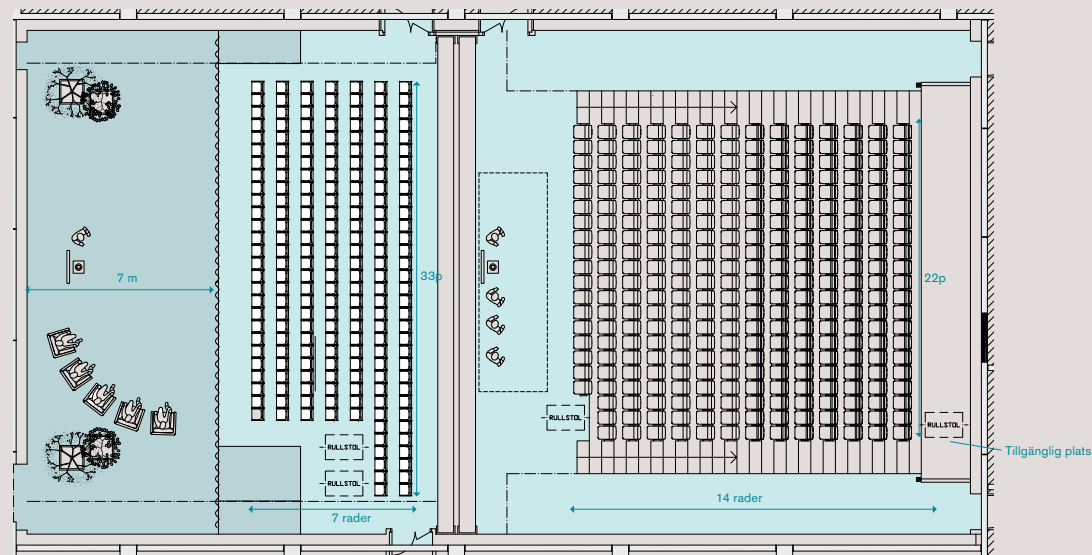

ACCESSIBILITY

The Loop and Science Village Hall are accessible for the disabled according to Swedish legislation. In the Event Hall, there are wheelchair places on stalls (chairs

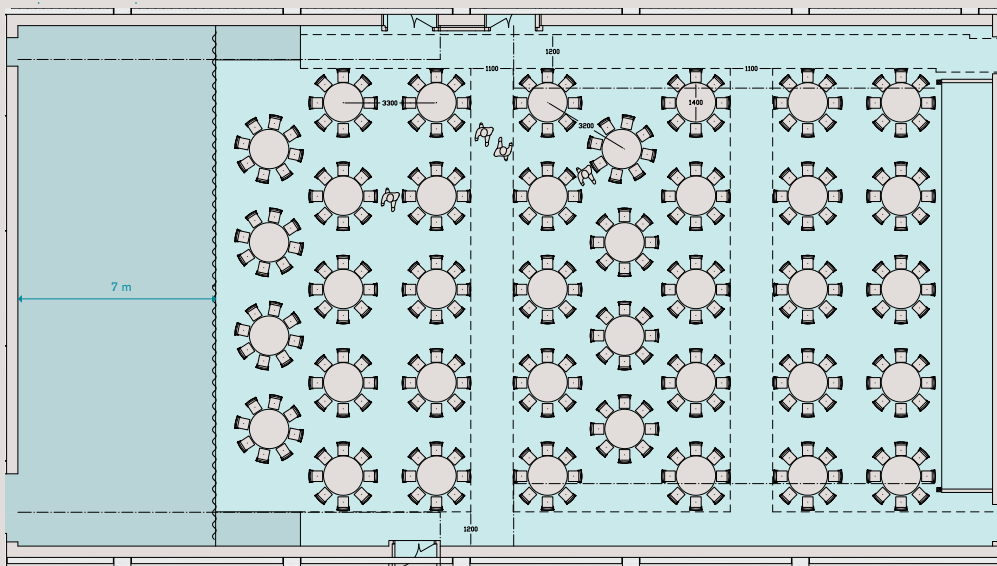

- Parking is located approx. 150m from the building.
- There is a hearing loop (magnetic loop/IR) in the event hall.
- Disability parking is available just outside the entrance for guests holding a disability parking permit.

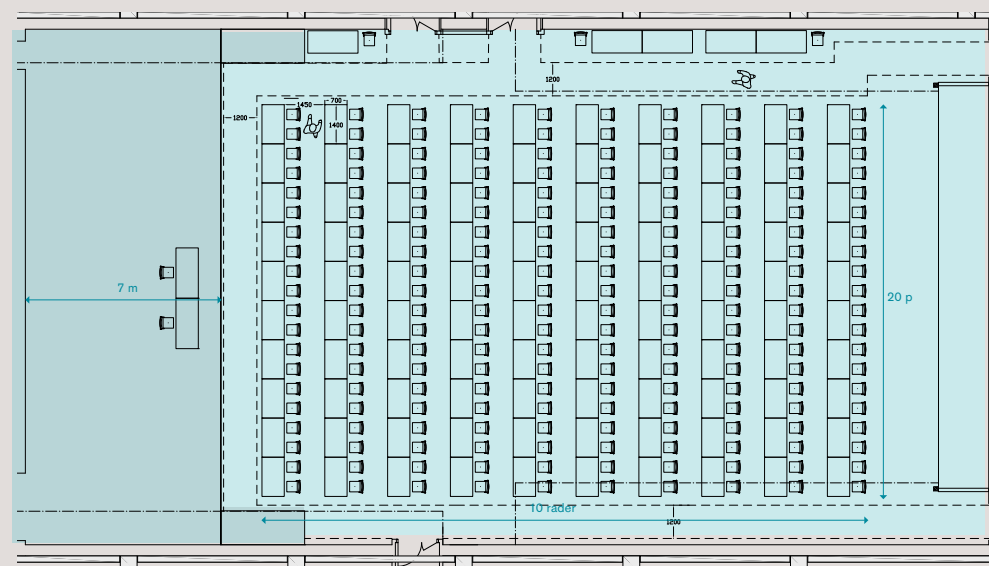

Cinema seating with 7m stage. Parquet 660 people (310 chairs & 350 in the telescopic seating). Side balcony 96 people and Upper balcony 142 people.

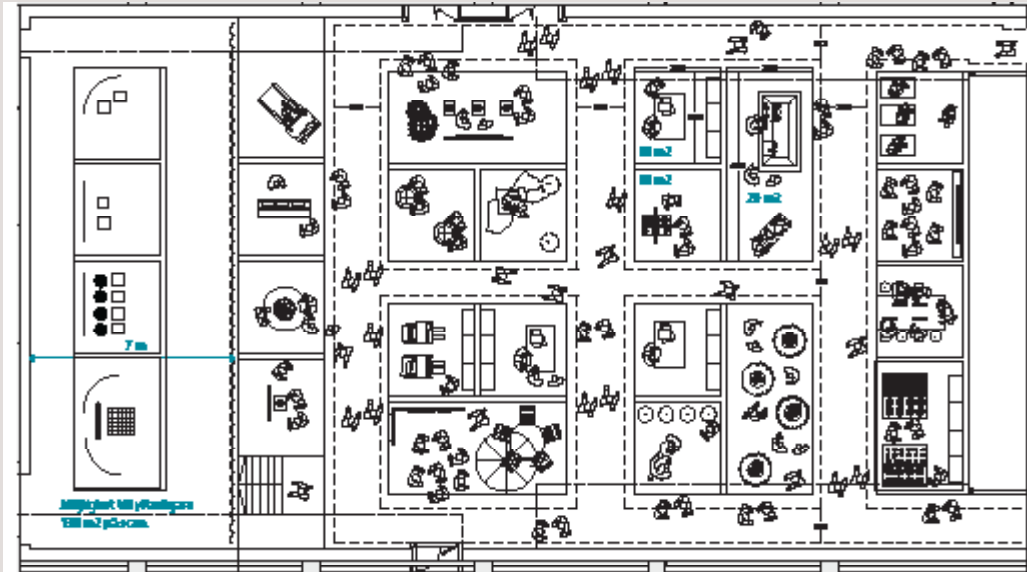

Cinema seating in two parts with partition. Stage side: 279 sqm for 200 people. Telescopic side: 336 sqm for 300 people

Banquet seating 6-8 people per table. 300 people

Conference or exam session. 200 people

Exhibition area 720 sqm incl. 130 sqm on stage. Up to 30 stands. 350 people

Dinner seating 6-8 people per table. 10m stage. 400 people
